

Sample Document for Unstructured Testing

This document contains various types of content such as regular text, code blocks, images, and tables. It is designed to help test the capabilities of the unstructured Python library.

```
def greet(name):  
    print(f"Hello, {name}!")  
  
greet("World")
```

Name	Age	Score
----- ----- -----		
Alice	23	89
Bob	30	92
Charlie	25	85
